

CYBERSTOCKROOM INVENTORY MANAGEMENT SOFTWARE

EXTENDED PROFILE

OVERVIEW

CyberStockroom (CS) allows you to build a complete map of all the locations/sub-locations within your business/warehouse. This map becomes the dashboard from which you can perform all your inventory/asset management operations. You can intuitively drag and drop items between locations, check items in/out of locations or quickly edit quantities.

The CS Map is a unique and powerful way to track your assets and inventory. A detailed activity history gives you complete traceability that can be filtered by user, location, activity type and time span.
