

# PROVISION WMS

# EXTENDED PROFILE

## **OVERVIEW**

ProVision WMS is a warehouse management system with real-time inventory tracking, instant stock updates, and error reduction to prevent stockouts.

Its user-friendly interface supports efficient order fulfillment through intuitive picking and packing features, ensuring accuracy and timely delivery. The system provides detailed analytics and reporting tools to help optimize operations and improve productivity.

## **INTEGRATION OPTIONS**

ProVision WMS integrates smoothly with existing systems such as ERP, CRM, and e-commerce platforms, facilitating seamless data flow. It includes mobile access for managing inventory and orders from any location, backed by robust security and dedicated support.

## **VISIBILITY AS A SERVICE (VAAS)**

Traditional supply chains often face visibility issues such as lost shipments, outdated inventory data, and unclear demand signals, leading to stockouts, overstock, and missed deliveries.

ProVision WMS addresses these issues by integrating data from systems such as transportation, IoT sensors, supplier networks, and customer orders. This provides real-time updates on inventory, shipments, production, supplier capacity, and demand patterns.
