

ODOO INVENTORY

EXTENDED PROFILE

OVERVIEW

Odoo Inventory is Odoo's warehouse management and inventory module. It aims to maximize warehouse efficiency via its open-source inventory management software by offering users a double-entry inventory system.

The Odoo Inventory software has no stock in, out, or transformation system. Instead, the operations are handled as moves between locations. This allows users to track stock from purchasing, through to warehouse bins, and onto sales orders, all from one system.

WHAT IS ODOO INVENTORY?

A customizable system, Odoo software is open-source, meaning users can access and modify the system at a code level. More basic customizations are also available, such as custom automation rules.

Odoo's inventory management system integrates with other Odoo modules, such as Sales, Purchase, and Accounting, and offers integration with many third-party 3PL systems.

As an online WMS, Odoo Inventory can be accessed via any device with an internet connection. Users can use the WMS on a free plan and add additional business process modules at a cost.

IS ODOO A WMS?

Odoo is a suite of open source software covering all areas of a business, from finances to sales. Odoo Inventory is its open source inventory management module which acts as a WMS.

CAN I USE ODOO FOR FREE?

Odoo prides itself on its affordability and accessibility. Your first Odoo module is free, including Odoo

FEATURE OVERVIEW

Inventory. However, if you'd like to install more Odoo apps, you'll have to pay for them.

SOFTWARE SCREENSHOTS

The screenshot shows the Odoo web interface for a product form. The browser address bar shows the URL: 192.168.1.9:8069/web?#id=2&view_type=form&model=product.template&menu_id=144&action=114. The top navigation bar includes Messaging, Warehouse, Reporting, and Settings. The user is logged in as Administrator.

The main content area is titled "Products / Widget One" and includes "Edit" and "Create" buttons. The product "Widget One" is shown with a "Can be Sold" checkbox checked. A summary card displays "100.0 On Hand" (highlighted with a yellow circle), "Moves", "Reordering Rules", and "Routes".

The "Inventory" tab is active, showing "Stock and Expected Variations":

Quantity On Hand	100.00 ⇒ Update
Incoming	0.00 ⇒ Request Procurement
Quantity Available	100.00

The "Status" section shows:

Status	In Development
Product Manager	

The "Storage Location" section shows:

Rack	B
Row	1
Case	5

The left sidebar contains a navigation menu with categories: Operations, Inventory Control, Traceability, Schedulers, Products, Configuration, and Routes.
