

SAP SCM

EXTENDED PROFILE

OVERVIEW

SAP SCM is a supply chain and warehouse management system which has been specifically created to manage high volume warehousing environments. Complex logistics are simplified through streamlined processes and real-time reporting and tracking, all available via hand-held online devices.

SAP SCM enables users to control every aspect of their warehousing business, maximize visibility and optimize resources. The software supports the full range of processes from stock management and rotation to billing, POS and goods receipts. SAP SCM works in partnership with SAP HANA to handle up to a million items and facilitates easy communication between staff and suppliers.

Online support community is available for SAP SCM as well as a range of training materials online, including a master guide for SAP Extended Warehouse Management 9.3. A number of upgrades and add-ons are available via the large SAP software catalog, pricing of SAP products is dependent on the individual modules chosen.
