

SAP EWM

EXTENDED PROFILE

OVERVIEW

Part of the wider Supply Chain Management suite, SAP EWM supports organizations in managing inventory, improving storage efficiency, and ensuring smooth supply chain operations. It is a successor to SAP Warehouse Management (WM) and incorporates advanced features for modern warehouse management.

COMPARISON: SAP WM VS. SAP EWM

SAP WM (Warehouse Management) is a basic warehouse management module within [SAP ERP](#). While it handles core warehouse operations like stock movement and storage, EWM offers more advanced functionality. SAP EWM supports high-volume, complex logistics with features like labor management, slotting, and detailed warehouse mapping, making it a more comprehensive solution. The transition to EWM from WM is ideal for businesses seeking scalability and advanced automation.
