

QAD DIGITAL SUPPLY CHAIN PLANNING

EXTENDED PROFILE

OVERVIEW

QAD Digital Supply Chain Planning (DSCP) is a comprehensive cloud-based solution designed to enhance supply chain performance for manufacturers and distributors.

It offers a suite of tools aimed at improving forecast accuracy, optimizing logistics, reducing manufacturing costs, and aligning financial objectives with operational plans.

KEY CAPABILITIES:

- **Demand planning:** Utilizes intelligent algorithms and machine learning to improve forecast accuracy, addressing complex sales behaviors and enhancing profitability.
- **Distribution planning:**
 - Offers a visual map of the supply network, making it easier to manage material flow and coordinate planning with stakeholders.
- **Production planning:** Provides capacity planning that takes into account resources, labor, and materials, helping to cut manufacturing costs and minimize waste.
- **Procurement planning:** Creates the most optimal plans for distribution, manufacturing, and procurement, helping planners easily spot when to speed up or delay processes based on changes in demand.
- **Financial planning:** Aligns operational budgets and sales targets with financial systems, enabling organizations to monitor revenue, profit, and supply chain costs against budgets.
- **Sales and Operations planning (S&OP):** Synchronizes internal departments and trading partners, breaking down silos to improve business alignment and lower supply chain costs.
- **Advanced scheduling:** Incorporates constraints like limited capacity and supplier lead times into the scheduling process, enhancing production flow optimization.

In its latest release, QAD DSCP has introduced features such as advanced analytics, enhanced supply chain data management, and dynamic filtering to provide a more intuitive and adaptive planning experience. The inclusion of "Ready-to-Plan" capabilities offers intelligent, rapid prototyping solutions, reducing time to value and cost of ownership.
