

# ORACLE SCM CLOUD

# EXTENDED PROFILE

## OVERVIEW

Suitable for a wide range of businesses, from enterprise to small, Oracle SCM Cloud has been designed to make businesses' supply chain management processes more efficient.

Oracle SCM Cloud delivers a range of services including online order fulfillment and processes, centralized monitoring, jeopardy calculation and user defined orchestration; an option which allows businesses to set their own bespoke processes.

Oracle SCM Cloud users are able to undertake a wide range of business activities including project innovation, integrated supply and demand planning, fulfillment, material sourcing. It allows businesses complete visibility over their entire supply chain, product lifecycles, supplier and customer liaison and warehouse activities from within the cloud.

As Oracle SCM is a cloud-based suite, all applications are accessible via any device with an internet connection. Training, implementation and ongoing support is available.
