

BLUE YONDER

EXTENDED PROFILE

OVERVIEW

Blue Yonder (formerly JDA Warehouse Management) offers in-depth, real-time visibility into all warehouse activities, providing real-time data on inventory, employees and equipment performance across all channels.

The platform is designed to be responsive to the demands of the omnichannel workplace, offering visibility across different channels, geographies, suppliers, and locations. It also is responsive to the demand shifts and other unexpected events. The WMS is highly customizable and is available both as an on-premise solution and in the cloud.

Blue Yonder provides dashboards that enable continuous monitoring and control of costs, productivity, and service. The systems dynamic workflows support the way you choose to organize your work, supporting documented best practices, and proactively tracks and manage exceptions.

Blue Yonder offers a self-assessment to start your process with the company, which provides a personalized report benchmarking your supply chain operations against best practice. Blue Yonder also offer implementation consultancy and user training services. 24/7 support is available through the Blue Yonder Customer Support Website; this also allows users to request software upgrades or raise enhancement requests.

WHAT IS JDA WMS?

JDA WMS is the former name for Blue Yonder WMS.
