

MAGAYA WMS

EXTENDED PROFILE

OVERVIEW

There are five main apps available with the Magaya Warehouse Management System.

1. WMS Mobile - Run the WMS solely from a mobile device
2. POD Mobile - Facilitate the pickup and delivery of parcels using handheld devices
3. Barcode Scanner - Log inventory information via barcodes
4. Scale Integration - Capture the weight and dimensions of packages
5. LiveTrack - Allows users to track packages in real-time

Magaya also offers a range of other services to integrate with the WMS, including; supply chain solutions and e-Commerce.

Magaya WMS also enables users to control and manage their cargo inventory before it arrives in the warehouse using tracking software. Further key features include picking and loading, automated billing, online transaction tracking, remote label printing, reporting, and warehouse sequencing.

Magaya is a cloud-based WMS; wireless handheld devices enable users to manage their business processes from any location with an internet connection. Or users can opt for the system to be installed onto computers.

A range of support services is available, including tech support and setup, plus implementation and training. Magaya WMS is a modular system, meaning that packages are selected according to the individual business requirements.
