

PASSPORT WMS

EXTENDED PROFILE

OVERVIEW

Passport WMS is a complete warehouse inventory control system that supports the needs of all manner of personnel, including warehousing, office, field, and management. The feature-rich system includes RFID capabilities, order processing, mobile inventory control, and reporting.

Capable of handling perishable and nonperishable goods, the system mainly caters to a manufacturer's warehousing needs.

PassportWMS can be trialed for free for 14 days.

SOFTWARE SCREENSHOTS

The screenshot displays the ASAP Systems software interface. At the top, a green header bar contains the text "Passport Stock". Below this is a navigation menu with various icons and labels: Home, Back, Next, Refresh, UI, Files, Purchase Order, Sales Order, List, Maintenance, Kitting, Sync Mobile Device, Error Check, Stock, Stock Inventory, Barcode, Reports, Document, View, Admin, Exit, and Help. A secondary menu below the navigation bar includes "Tree", "Home Screen View", "All Panels", "Dashboard", and "H".

The main content area is divided into two sections. The first section, titled "QUICKSTART", contains four numbered steps: 1. Start here! Enter your basic information. 2. Receive inventory. 3. Perform day to day inventory transactions. 4. View your inventory data. Each step has associated icons and a list of options. Step 1 includes "Basic Setup Info" (Stock, Locations, Person, Supplier) and "Optional Setup Info" (Purchase Order, Sales Order). Step 2 includes "Receive". Step 3 includes "Move", "Issue", and "Dispose". Step 4 includes "Stock Inventory", "Reports", and "All". A note at the bottom of this section states: "These tasks are often performed using a mobile device".

The second section, titled "LIFECYCLE", shows a flowchart for "Stock". The process starts with "Receiv" (Receive) and "Adjust". It then flows to "Move", which branches into "Issue" and "Pack". "Issue" leads to "Ship", and "Pack" also leads to "Ship".
