

# WAREHOUSE EXPERT EXTENDED PROFILE

## OVERVIEW

Warehouse Expert from Made4Net aims to manage the entire warehouse cycle process, from receiving through to storage, shipping and replenishment.

Made4Net's Warehouse Expert system is based on SOA Microsoft technology, the system can be customized to meet industry specific needs and requirements. Real-time data is collected at each stage of the warehouse process and is displayed on a warehouse map along with location of pallets, performance and utilization metrics.

Warehouse Expert can integrate with Microsoft Dynamics, SAP Business One and other major ERP systems, meaning companies can remain with their existing ERP and enhance their warehouse management system.

In terms of technology, Warehouse Expert can be configured to operate with RF and voice terminals, RFID as well as a range of ERP software systems and accounting software systems.
