

INFOR SCM

EXTENDED PROFILE

OVERVIEW

Infor Supply Chain Management (SCM) combines transportation management, warehouse management, labor management, and 3PL billing into a single application on a unified database to reduce the complexity of warehousing operations and make decision-making processes more efficient.

Storing all data in a single database allows Infor to keep information in sync and up-to-date across different warehouse disciplines.

Infor SCM can be specialized by industry, offering unique functionalities to meet industry standards and requirements. Examples of these industries include food and beverage, pharmaceuticals, and chemicals.

WHAT IS INFOR SCM?

Infor SCM aims to improve gross margins and customer retention by helping to reduce inventory wastage and improve perfect order scores. It includes Infor WMS, a best-of-breed, Tier-1 inventory and warehouse management system.

In terms of hosting, Infor SCM can be deployed in the cloud or on-premise. The software can be accessed via an iOS app and can be accessed remotely.
