

SPHEREWMS

EXTENDED PROFILE

OVERVIEW

SphereWMS software is geared towards eliminating paper-based management systems in organizations with multiple warehousing facilities. The key product uses are to drive workflow efficiency at an operational level while minimizing costs across the 3Ps.

To do this, SphereWMS is centered on functionality that improves a warehouse's receiving processes. Advance Receipt Notice and Advance Ship Notice handling tools allows users to quickly receive, send and file receipts and orders electronically and efficiently. In addition, the order fulfillment tool integrates customers' business requirements into the system, optimizing the fulfillment process. The SphereWMS dashboard feature allows for easy reporting and data display.

SphereWMS is a fully hosted, web-based cloud-based solution, which is also available via iOS and Windows Phone applications. The pricing model is based on a monthly, per-user subscription basis.
