

KHAOS CONTROL

EXTENDED PROFILE

OVERVIEW

Khaos Control is an inventory management solution that comes equipped with an integrated WMS. It is aimed at small to medium-sized businesses in a range of B2B and B2C industries.

The key product is real-time stock control at multiple sites via multiple sales channels although a big emphasis is also placed on drop shipping. The solution allows companies to automatically generate and forward purchase orders to suppliers alongside official documentation that facilitates efficient drop shipping and order fulfillment.

The WMS comes as an additional feature, which can be integrated with handheld terminals that Khaos Control installs. The software can be deployed across a range of hardware and delivers real-time, business-critical information to staff and management in order to optimize warehouse operations at multiple sites. Another key feature is the Khaos Control Matrix, which affords companies and their clients the ability to drill down on products to quickly see the availability and stock level of each variety.

SOFTWARE SCREENSHOTS

The screenshot displays the KHAOS CONTROL software interface. The main window is titled 'Customer Mrs Rita Richards' and shows a 'Communication Log' table. The table lists various communication events with columns for Index, User, Contact Type, Date, Time, Source, Description, Response, Rec Date, and Exp Date. The interface also includes a sidebar with navigation options like 'Purchase Manager', 'Customer', 'Sales Orders', and 'CRM Manager'. At the bottom, there is a 'Description' and 'Response' field for the selected communication event.
