

AIMTEC DCIX

EXTENDED PROFILE

OVERVIEW

Aimtec DCIx is a system that controls logistics processes in warehouses and production, from receipt to shipment. The WMS provides an overview of the product flow in real time using automated identification of handling units and warehouse positions by employing bar codes, RFID, pick-by-voice, pick-by-light, augmented reality or by technologies run by weight systems and automated warehouse rack systems.

Aimtec DCIx offers set of preconfigured functions based on industry best practices. The WMS can be integrated with manufacturing execution, quality management, yard management and, supply chain portals.

Aimtec DCIx is a WMS that can be installed on-premise or hosted via the cloud, it is applicable for use by most manufacturing, production, logistics and supply companies which handle non-perishable goods. The system requires no additional programming to adapt to unique customer requests due to the easily configurable architecture.

Aimtec DCIx can also be integrated with major ERP systems, such as SAP, MS Dynamics, and others, and Aimtec provides global 24/7 multilingual support.
