

# LOGIMAX WMS

# EXTENDED PROFILE

## OVERVIEW

Logimax is a warehouse management system that leverages the strength of the IBMi platform. It is built for 3PL and multi-customer warehouse businesses. It is also suitable for distribution companies in industries such as consumer packaged goods, pharmaceuticals, cold storage and more.

Logimax WMS is web-based and can be installed on-premise or in the cloud. It can also integrate with the company's existing systems like ERP, EDI, TMS and more. Logimax offers a warehouse management foundation with additional modules such as e-commerce and yard management that can be added as needed. Users have access to various analyses and reports to monitor KPIs, trends, revenue, costs and more.

For every customer or product, every transaction is automatically adjusted to meet the criteria associated with that customer so that rules, rates, packing and location preferences can all be enforced. Logimax also offers support for RF data collection, integrated third-party billing, a report designer and a client self-service portal.
